UNDERGROUND ELECTRICITY CABLE DANGERS

Take care when gardening this **SUMMER**.
You or the lives of the ones you love could be at stake...!

- Be careful when digging post holes or driving stakes in the ground on your property or road frontage. Never assume an area is clear of electricity cables.
- Cables are not necessarily laid in a straight line and depths can vary in different situations. They are also not designed to withstand a blow from a tool or any other object.
- Call us for a cable location or advice if you have any doubts.
- Also, if a cable becomes damaged or you suspect damage, contact us immediately –
